ROCKnWOOL

First-person task data for robotics and physical AI

Spec sheet, November 2026
rocknwool.com/spec

Egocentric video of real work, filmed by the people who do it.

Trained operators in Indonesia, Brazil, Mexico, China and Denmark record their own work from a first-person view, with signed consent and documented rights on every clip.

CAPTURE	**Cameras**	Phones, action cameras, Insta360 X5 and X6, or your own rig, including stereo.
	Mount	Head or chest, framed so hands and objects stay in view.
	Video	1080p to 4K, 30 to 60 fps, or your spec.
	On request	Depth, motion and body tracking; tactile gloves you supply.
ENVIRONMENTS	**Hospitality**	Hotel rooms, villas, laundries, housekeeping, homes.
	Kitchens	Prep, cooking, plating and dishwashing in working kitchens.
	Industry	Light manufacturing, assembly, warehouses, packing, retail and maintenance.
DELIVERABLES	**Video**	Accepted clips at the agreed resolution and frame rate.
	Metadata	Task, environment, country, operator ID, consent record, device, mount, resolution and frame rate.
	Labels	On request: timestamped task steps, hand pose (21 keypoints per hand, 2D and 3D), failure and recovery events.
	Formats	MP4 and JSON by default. LeRobot v3, HDF5, RLDS, MCAP or your schema.
	QA report	Every batch: accepted and rejected hours, with reasons.
CONSENT AND RIGHTS	**Consent**	Signed by every operator in their own language, for commercial AI training.
	Site release	Owner approval in writing. No guest-occupied rooms.
	Privacy	No faces, bystanders, documents or screens in frame.
	Traceability	Each clip links to an operator ID, consent and release.
	Rights	Exclusive or non-exclusive, agreed per project.
HOW WE WORK	**Sample pack**	Raw and labelled samples to judge before you commit.
	Protocol	Tasks, device, metadata and acceptance criteria in writing.
	Pilot	A small trained group records a first batch to your spec, then we scale, supervised on location.
	Pricing	Per accepted hour. Rejected hours are not billed.
